

WHITEPAPER FSD COIN

INTRODUCTION

NFT or Non-Fungible Token are digital assets that represent real-world objects such as art, music, game items, and videos. NFT are sold and bought online, often with cryptocurrencies, and they are generally coded with basic software in the blockchain. NFT can be built on various blockchain networks including: Binance Smart Chain, Ethereum, Polygon, Solana, etc. However, until now, NFT is more familiar with being built on the Binance Smart Chain network and the Ethereum network. From the two networks, the NFT built on the Binance Smart Chain (BSC) network is superior, because the Binance Smart Chain (BSC) network is more efficient and gas fees are very cheap compared to the Ethereum network which is known to be very expensive. And one more thing the Binance Smart Chain (BSC) network is more popular than the Ethereum network.

Based on the above considerations, FSD Coin is built on the Binance Smart Chain (BSC) network so that it can be reached by all market segments so that FSD Coin can be better known by cryptocurrency users around the world. FSD Coin fulfills the dream of bringing crypto to people around the world in an easy way.

1. ABOUT FSD COIN

Binance Smart Chain (BSC) was developed as a means to leverage solidity-based smart contracts with significantly greater speed and efficiency than other competing smart chains. With the decentralized exchange on BSC offering lightning-fast swaps and extremely low fees, BSC has become one of the most widely used blockchains for Decentralized Finance (DeFi). BSC uses a token protocol developed by the Binance Team called BEP-20.

FSD Coin is one of the BEP-20 tokens of the Binance Smart Chain (BSC) with a fixed supply initial of 1,000,000,000. FSD Coin is an NFT real marketplace project that is very well designed and prepared for you. Starting from 2018 until now we are monitoring the movement and growth that occurs in the crypto world, especially the NFT world.

The supply of FSD Coin will never increase, it will only decrease with every transaction there will be burning. For its own liquidity, FSD Coin is locked in Pinksale for 1 year. And we are also committed to every sale and purchase tax on the NFT FSD Coin marketplace, we will do buybacks and burnings.

2. VISION

The introduction of Blockchain and NFT systems will make it possible to solve many of the problems found in traditional markets (plagiarism, scarcity, authentication). Using Blockchain to support artists around the world and promote their work while providing a secure environment will be at the core of our business platform.

Why NFT (Non Fungible Token) ?

The NFT standard allows for verifiable digital rarities with proven authenticity and irreversible proof of ownership. NFTs allow for more detailed attributes to be included, such as metadata about assets and authenticated details that allow owners to be confident about the authenticity and origin of the NFT.

Our goal is to work with all artists and make their work visible while protecting their copyright and preventing intellectual property theft. The goal is not to industrialize production because it will have very negative side effects and even lead to loss of product quality and authenticity.

3. TOKENOMICS

Token Symbol	: FSD Coin
Supply	: 1.000.000.000
Blockchain	: BEP-20
BSC kontrak	: 0X.....

FSD Coin implements 5 simple functions in the tokenomic system in every trading transaction subject to an 8% tax consisting of :

1. Buyback : 2 %
2. Marketing : 2 %
3. Development Project : 1 %
4. Burn : 1 %
5. Liquidity : 2 %

4. ROADMAP

Phase 1- Earth	Phase 2- Roket
<ul style="list-style-type: none">- Build Community NFT- Website NFT Gallery Launching- White Paper Launching- Token Development- FSD Coin Lunning- Marketing Push- Burn 1% supply	<ul style="list-style-type: none">- Event NFT Contest- FSD CMS Platform- Push Marketing- Burn 1%- CoinGecko Listing- Partnership- Stacking FSD/USDT
Phase 3- Moon	Phase 4- Mars
<ul style="list-style-type: none">- Techrate Audit- Coinmarketcap Listing- Push Marketing- Burn 1%- Cex Listing- FSD Marketplace NFT Launching- Partnership with Aktris NFT- NFT Moon Special Edition Launching	<ul style="list-style-type: none">- Certik Audit- Cex Listing- NFT Global Market- Partnership with big company- NFT sales boost

5. MARKETPLACE

In phase-2 the NFT marketplace is created and the first version of the NFT Marketplace will be launched in phase 3.

The platform will consist of 4 main pages:

1. The main page that will display all the NFT works for sale,
2. Mint page that allows artists/sellers to upload artwork for sale,
3. User profile page,
4. Product page.

Users can print their own NFTs or choose to purchase NFTs created by other users. In the next step the application allows users to easily deposit BEP-20 tokens into the NFT. Sellers will have the possibility to auction off their art or set a fixed price. Our marketplace will be the primary platform for posting/buying and publishing art.
